

UniUpdate 0002

Product & Technical Support Information

Dear EXOR International,

the UniOP and JMobile web sites have been recently updated with some important documentation.

We would like to recall your attention on them.

Please see following the details.

JMobile Updates

The Product Technical Note [Ptn0341](#) has been published. It contains important information about how to update the UniOP eTOP400 series systems components.

We strongly suggest to read the document before proceeding with any update. In case of any doubt, please do not hesitate to contact Sitek Technical Support.

JMobile is a very powerful product and with a very high degree of flexibility. It is anyway respecting some specifications in terms of features, functions and performances. The Product Note [Ptn0345](#) contains a list of features with their specifications. Studio will be soon updated to dynamically control such "limitations". The document is available for registered users.

Regards

Sitek Technical Support Team
